tivizen nano

TV for your iPhone, iPad, iPod touch & Android™

Article Number: 0442
EAN Code: 8809208580442

Tivizen nano is a high performance and innovative DVB-T receiver that turns your iPad, iPhone, Android Tablet, or Smartphone into a mobile television without an internet or 3G connection. Tivizen nano connects to Wi-Fi with your Apple or Android device. Tivizen nano transmits the television signal at a very high range directly to your device.

» live television with brilliant quality at any time and everywhere (DVB-T-Reception required)
» record live television onto your Apple or Android device
» use the EPG guide to be up to date what's next on TV
» up to 3,5 hours operation period
» free „tivizen" App available on the App Store for Apple devices or the „tivizen DVB-T Wi-Fi" App on Google Play for Android devices
